

## Bioplastic Packaging Material

### *Salient features*

- Bioplastic flexible packaging film developed using bioplastic granules by blown extrusion method
- Melting temperatures of the bioplastic granules ranging between 140 to 150°C .

### *Advantages*

- ✓ Used for packaging dried food products such as potato chips, wheat flour and bread

### *Process technology / product developed by*

Dr. S Anandakumar, Department of Food packaging and system Development  
Indian Institute of Food Processing Technology (IIFPT), Thanjavur - 613005, Tamil Nadu

Email: [anand@iifpt.edu.in](mailto:anand@iifpt.edu.in)

### *Year*

2019-2020

### *Source of funding*

Ministry of Agriculture and Farmers Welfare; Crop Division, NFSM cell

### *More information*

#### **Status of commercialization / Patent / Publications**
