
Fruit Ripening Chamber

Salient features

- The portable chamber with capacity of 1 ton/batch
- Dismantled and reassembled easily
- Fitted with air conditioner, humidifier and ethylene gas generator for creating suitable environmental condition for ripening.
- Chamber temperature of 17-18°C with 90-95% relative humidity

Advantages

- ✓ Safe and hygienic practice leading to better quality and shelf-life of ripened products

Specifications

Size of the chamber: 2.4 × 2.4 × 2.5 m

Material of construction: EPE foam sheets and twin wall PC sheets as insulating wall material

Air conditioner capacity: 1 TR

Capacity: 1 ton of fruits per batch

Ripening time for banana : 4-5 days

Machine developed by

Dr. S.K. Giri, Principal Scientist

ICAR-Central Institute of Agricultural Engineering (CIAE), Nabibagh, Bhopal 462038
