

Machine for the Extraction of Aloe Vera Gel

Salient features

- Portable Machine
- Reduction in drudgery
- Hygienic extraction of whole gel
- Reduced aloin content in extracted whole gel

Advantages

- ✓ 60-70% saving in time over conventional method.
- ✓ 50-60% saving in cost over conventional method.

Specifications

Gel extraction capacity: 70-200 kg/h

Machine developed by

Dr. Ravindra Naik, Principal Scientist
ICAR-Central Institute of Agricultural Engineering (CIAE), Regional Center,
Coimbatore, 641007
Email: naikravindra@gmail.com

Year

2010

Price / Unit

₹ 70000/-

More information

Status of commercialization / Patent / Publication
Ready for commercialization
