

Shelf Life Extension of Capsicum

Salient features

- Standardized protocol for shelf life extension of capsicum under modified atmospheric packaging (MAP) storage
- The shelf life of capsicum can be significantly increased in expanded polyethylene biopolymer under modified atmospheric storage

Advantages

- ✓ The small and big size capsicum stored at 3°C resulted in significant decrease in total antioxidant activity from 109.85-24.44 and 109.85-26.25µM TEAC/g, dm, respectively after 49 days of storage

Process

Technology / Product developed by

Dr. Sudhir Singh, Division of Crop Production,
ICAR-Indian Institute of Vegetable Research (IIVR), Jakhini, Varanasi-221305, Uttar Pradesh
E mail: sudhiriivr@gmail.com

Year

2013-14

Source of funding

ICAR-IIVR, Varanasi

More information

Status of commercialization / Patent / Publications

The technology of shelf life extension of brinjal and capsicum has been demonstrated in various training programmes.
